Treat stains as soon as possible after staining. The older the stain, the more difficult it will be to remove.

All stain removal methods should be applied prior to laundering washable garments. Stains that have been laundered and dried are almost impossible to remove.

Washable Fabrics

What you will need

- Pretreatment laundry stain remover
- Heavy-duty liquid detergent
- Chlorine bleach or oxygen bleach
- Dry cleaning solvent
- Absorbent paper towels

Steps to Clean

1. Saturate area with pre-treatment laundry stain remover (aerosol types work better on greasy stains) Wait one minute for product to penetrate the stain. For stubborn stains, rub with heavy-duty liquid detergent. Launder immediately.
2. If color stain remains, soak/wash in chlorine bleach if safe for fabric, or in oxygen bleach.
3. For extra heavy stains, apply dry cleaning solvent to back of the stain over absorbent paper towels. Let dry, rinse. Proceed as above.
